Seeking a **full-time** position in **project management** and/or **software architecture**. I'm a passionate leader (managing development teams since 2021) and experienced developer (coding since 2016).

Strengths

- **Project & Product Management**
- **Agile & Scrum** (with user story creation)
- **Architecture Design**
- **Web & Mobile Development**
- **UI/UX Design**
- **Prompt Engineering and AI Tools**

Education

- **BS/MS in Software Engineering**, Rochester Institute of Technology, May 2026 (3.89 GPA)
- Minors in **Computer Science** and **Psychology**

Relevant Experience

Head Project Manager & Lead Software Architect, CogbiasAI (Spring 2025 - Present)

I pioneer product development, working under the CTO to oversee the products' architecture, roadmap, and cross-functional execution. I:

- Lead teams of developers across backend, frontend, and internal AI API integration
- Architected the full system and designed scalable infrastructure from the ground up
- Wrote user stories, defined sprints, and served as Scrum Master to ensure on-time delivery
- Created and maintained the product roadmap, acting as both Product Manager and Owner
- **Outcome: high-quality products that attracted both customers and early investor interest**

Tools: Agile, Jira, Figma, Github, AI Tools, React, Node.js, etc.

Team Lead, Accessible Learning Labs (Spring 2025); recently promoted to Head Project Manager

I led the Imagine 2025 project, managing software development & execution while ensuring smooth collaboration across the team. I:

- Acted as Scrum Master, managed the scrum board, assigned tasks, and facilitated workflows
- Designed the software architecture and coordinated backend, frontend & third-party integration
- Oversaw advertising and outreach strategy for project participation
- **Outcome: a record-breaking response rate and high-quality data for long-term analysis**

Tools: Agile, Trello, Figma, React, Node.js, TypeScript

Product Manager Co-op, Sorenson Communications (Summer 2024)

I was assigned projects related to AI tool integrations, coordinating with development teams to ensure a high-quality product. I:

- Wrote an official project proposal, conducted market research, and helped find customers
- Created wireframes and user stories, did QA testing, and analyzed user feedback
- **Outcome: a high-quality product that attracted many customers at a conference**

Tools: Figma, Jira, Excel, TestFlight, Machine Learning Models, Agile, Confluence

Other

I was a **Full-stack Developer** at LightRiver Software (2023) and a **Web Engineer** at Vuzix Corporation (2022).

Hobbies: I am an **ethical hacker**, **cybersecurity researcher**, founder of a **software company**, and **coding tutor**. I worked as a professional **film actress**, and I studied the **violin** at Juilliard.
